# Our Mission

**IELT** strives to train the students in technical education with moral values and discipline among the students, so that their future is blossomed with good culture.

# Construction & Oil Industry

- Demand Vs Supply
- Opportunities – Construction Companies
- Oil & Gas Companies

- ❖ Placed 1000+ students in Construction Industry as Safety Supervisor / Safety Officer.
- ❖ Wide Spread network with HR's of leading construction companies across India to fulfill their demand for quality manpower on time.
- ❖ Special Sessions for students after the class on the subject topic regularly.
- ❖ Reading Sessions for Students to improve Communication & listening skills.
- ❖ Sessions on interview preparations.
- ❖ Industry experienced technical team.

# Demand

- Construction Industry
- Oil & Gas Companies
- Fire Industries

It is a job with high status. A safety officer is a highly respected person in his office. He works with dignity and it is always a management position.

The salary (you can draw in any field) and the experience (you require to get that salary) in any career greatly depends on the demand & supply gap. There is a huge shortage of trained hands in this field. The booming constructional industry becoming strict with statutory safety rules and norms and acute shortage of trained hands in constructional safety is widening the gap between demand and supply , making it possible for anyone with knowledge in the field from a reputed organization, to latch on to huge salaries and good designations in safety.

# Accreditation / Member

# First Aid Training Class

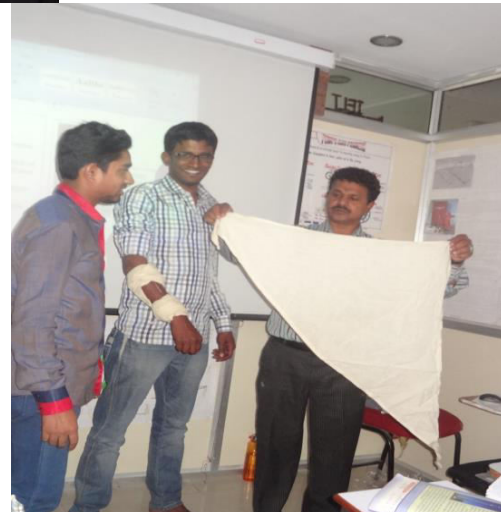

- First aid is essential in emergency cases. Knowing what action needs to be taken to control an emergency can make the difference between life and death.
- Emergencies occur all around us, in all spheres of life. Someone may be injured at work, school or at home.
- When this happens, first aid basics will equip anyone around the injured person to reduce the danger posed by the accident.

**First aid does not eliminate the need for a hospital, First aid is used to contain an emergency situation.**

# Fire Practical's

We have our own practical system , wherein our students will get maximum exposure to the latest technologies and equipments available in the market. And also we have an association with big companies to impart best practical training knowledge to our students to make them industry ready.

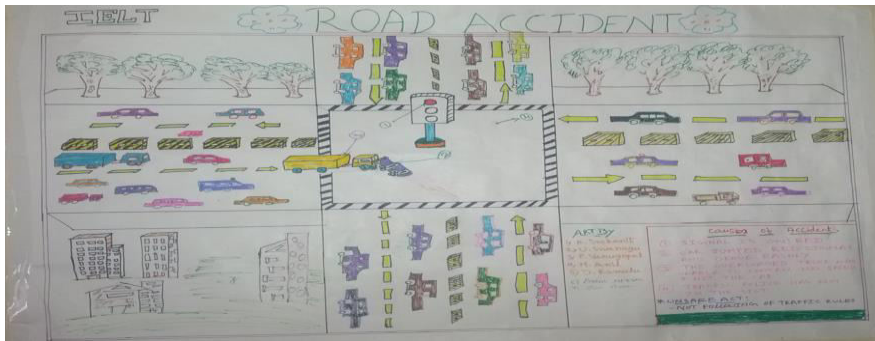

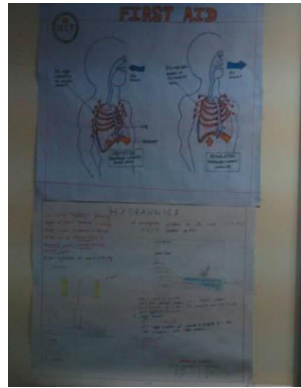

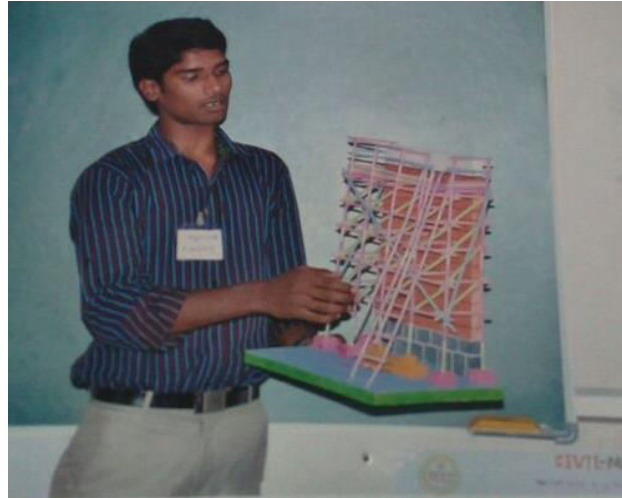

The old-school model of passively learning facts and reciting them out of context is no longer sufficient to prepare students to survive in today's world.

These 21st century skills requires personal and social responsibility planning, critical thinking, reasoning, and creativity strong communication skills, both for interpersonal and presentation needs cross-cultural Understanding visualizing and decision making knowing how and when to use technology and choosing the most appropriate tool for the Task.
